SOPRASEAL STICK VP

TECHNICAL DATA SHEET **260408SCANE**

(supersedes 250728SCANE)

DESCRIPTION

SOPRASEAL STICK VP is a self-adhesive membrane composed of a tri-laminated polypropylene facer. The self-adhesive underface is covered with a silicone release film.

SOPRASEAL STICK VP is a vapour permeable air barrier membrane used on exterior wall construction.

RECOMMENDED SUBSTRATES

This product can be used on most substrates, such as masonry, concrete, wood and gypsum.

SURFACE PREPARATION

The substrate should be clean, sound, dry and free of loose materials, grease and any contaminants, which may compromise the performance of the product. SOPRASEAL STICK VP is installed on most substrates without primer. However, in a case where specific job site conditions may otherwise require surface preparation, SOPRASEAL VP PRIMER can be used.

INSTALLATION

SELF-ADHESIVE

1. Adhere the SOPRASEAL STICK VP membrane to the substrate, by removing the detachable silicone release film from the self-adhesive underside.
2. The longitudinal overlaps should be at least 50 mm (2 in) and transversal should be at least 75 mm (3 in).
3. Apply pressure over the whole surface using a membrane roller to ensure a complete and uniform adhesion.
4. Seal details, reverse laps and critical areas with SOPRASEAL SEALANT and SOPRASEAL STICK FLASHPRO or SOPRASEAL STICK 1100 T membranes. For more information, please visit the details on the SOPREMA website.

Application temperatures: -7 to 40 °C (19 to 104 °F)

Service temperatures: -40 to 85 °C (-40 to 185 °F)

UV exposure: up to 180 days

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
